

§ 10.2 Funding.

Groups who represent producers, distributors, consumers or users, or others that wish to act or continue to act as proponent organizations for the development or maintenance of a Voluntary Product Standard will be required to pay for administrative and technical support services provided by the National Institute of Standards & Technology and such other direct or indirect costs associated with the development or maintenance of that standard as may be deemed appropriate by the Department, including costs to the Department in connection with the operation of the Standard Review Committee and the Standing Committee. Funds may also be provided by a government agency at the request of a proponent organization or when acting on its own behalf for the development or maintenance of a Voluntary Product Standard. Proponents of standards that meet sponsorship criteria established in these procedures shall furnish an initial deposit of funds sufficient to cover the first year's services and other costs. Estimated annual costs will be based on an hourly rate for salary and overhead established by the Department for the National Institute of Standards & Technology's administrative and technical support services plus estimates of direct costs to provide funds for such items as the travel of consumer representatives unable to otherwise attend committee meetings, travel for Department staff, and printing costs. Project funds will be reviewed annually. Excess funds may be refunded or applied to the next accounting period. Should funds from deposits be inadequate during an accounting period, work on the project will continue only if funds are restored to a level estimated adequate to complete the 12-month period.

[51 FR 22497, June 20, 1986, as amended at 55 FR 38315, Sept. 18, 1990]

§ 10.3 Development of a proposed standard.

(a) A proposed standard as submitted to the Department:

(1) Shall be based on adequate technical information, or, in the case of size standards (including standards

covering the quantities for packaged consumer commodities), on adequate marketing information, or both, as determined to be appropriate by the Department;

(2) Shall not be contrary to the public interest;

(3) Shall be technically appropriate and such that conformance or non-conformance with the standard can be determined either during or after the manufacturing process by inspection or other procedures which may be utilized by either an individual or a testing facility competent in the particular field;

(4) Shall follow the format prescribed by the National Institute of Standards & Technology. (Copies of the recommended format may be obtained from the Office of Product Standards Policy, National Institute of Standards & Technology, Gaithersburg, Maryland 20899.);

(5) Shall include performance requirements if such are deemed by the Department to be technically sound, feasible, and practical, and the inclusion of such is deemed to be appropriate;

(6) May include dimensions, sizes, material specifications, product requirements, design stipulations, component requirements, test methods, testing equipment descriptions, and installation procedures. The appropriateness of the inclusion in a standard of any particular item listed in this subparagraph shall be determined by the Department; and

(7) Shall be accompanied by rational statements pertaining to the requirements and test methods contained in the standard, if deemed necessary by the Department.

(b) A proposed standard that is determined by the Department to meet the criteria set forth in paragraph (a) of this section may be subjected to further review by an appropriate individual, committee, organization, or agency (either government or non-government, but not associated with the proponent group).

(c) A proposed standard may be circulated by the Department to appropriate producers, distributors, users, consumers, and other interested groups for consideration and comment as well
